MultiTaction’s Showcase presentation software delivers the ultimate interactive experience. With touch and go interactivity, people can walk up and start using the wall right away. Showcase makes exploring and discovering content super easy.

All organizations spend a significant amount of time creating a wide range of media assets to tell their brand’s story. Some materials are aimed at clients, some are aimed at employees to educate or guide, and some content is simply meant to entertain. Showcase provides a fully interactive and customizable stage, where your rich media assets can perform to engage and delights clients, staff or visitors alike.

With its intuitive design interface creating content can be done in-house, saving both time and money. Put an end to “death by PowerPoint.” Presentations can be transformed from boring slide desks to dynamic content by using Showcase software. Or make a lasting impression on visitors with content that draws them into the experience. Showcase software allows you the freedom to let your creativity flow.

Bring your touch screens to life with the ultimate interactive experience from MultiTaction.

Engage – Delight – Entertain – Present
KEY FEATURES

HARDWARE AGNOSTIC
Although there are many advantages to running MultiTaction software on MultiTaction hardware, our software is compatible with most touch screen displays and video walls that meet the minimum technical requirements, including the any Windows compatible display.

BETTER TOGETHER
When you run Showcase on a MultiTaction display you gain access to features unique to MultiTaction including unlimited points of touch and Codice. Codice is based on MultiTaction’s proprietary Enriched Reality technology. 2D bar codes can be printed on a wide range of objects and can turn anonymous public displays into personal two-way tools that benefit the user and the content owner.

WALK-UP INTERACTIVITY
No training necessary. If you can use a flip chart, you can use MultiTaction software. It’s that easy.

PEN SUPPORT
You can draw or write on MultiTaction hardware using our IR pen; third party pens are also supported. When running MultiTaction software on third party hardware, pen support must be available, for this feature to function.

BROWSER-BASED EDITOR
The Showcase editor is where the stage is set, providing a powerful and flexible tool to create the desired experience. You simply drag and drop your media content into the presentation structure that you have defined for your showcase.

RICH MEDIA SUPPORT
Showcase provides support for various video formats and image formats as well as browser URLs and PDF files.

BESPOKE THEMES
The ability to control the way object behave on the stage, as well as how they enter, provides significant control over the user experience.

CUSTOMIZABLE NAVIGATION.
All aspects of the navigation control can be customized from the icons to the connections to the behavior of menus. Nodes can either launch sub menus, or a viewer for an object, such as an image or video for breakout sessions.

Bundle Showcase with Canvus for greater engagement
