

From a Decade of Engineering and Design Emerges the Decca Interactive Display by MultiTaction

Investing a decade of innovation into perfecting the interactive video wall experience, MultiTaction unveils the Decca (MT557D). Decca's visually stunning graphics on a new satin smooth, antimicrobial touch surface further elevates the user experience that only MultiTaction can offer.

Decca incorporates the next generation of MultiTaction's revolutionary ClearSight touch technology, allowing unlimited simultaneous touches from fingers, hands, pens and Codice 2D markers. Now with 30% more processing power, ClearSight gives each user an interactive experience that is so responsive, it rivals the best of today's highest-end mobile devices.

MultiTaction's unique touch technology enables interactive video walls to be scaled to any size and configuration. This allows for unique table, curved wall, and right-angle applications impossible with other touch technologies.

KEY FEATURES

RESPONSIVE

ClearSight touch provides the fastest, most responsive and reliable touch tracking system of any video wall display on the market. Users experience the same instantaneous control they expect on their personal touch displays on a much larger scale.

STUNNING

The unique touch technology of Decca allows for a very wide range of display configurations allowing your creativity to run wild! Decca supports curves, right angles, and table configurations. The touch technology is infinitely scalable to support walls of enormous proportions.

DURABLE

With edge-bonded cover glass, an extended aluminum frame and the ability to run 24/7 the build quality is second to none. Whether you need a video wall to handle a round-the-clock control room or a high-traffic public lobby, MultiTaction commercial-grade displays are built to handle it.

ACCURATE

Engineered with pinpoint accuracy, which means no periodic re-calibration is needed, install and go. Enabling the largest video walls in the industry to operate without need to ongoing adjustments makes life a lot easier.

ENGAGING

Truly unlimited, simultaneous touch points using fingers, pens, Codice markers and even most gloved hands. This means every user will experience the same engaging touch experience regardless of how many people are working together.

EFFORTLESS

Decca's satin smooth touch surface makes interacting fun and effortless. Decca is also the first display from MultiTaction to feature an easy-to-clean, antimicrobial touch surface.

QUIET

The powerful exhaust system uses forced air, which utilizes low noise variable speed internal fans. Background noise can be distracting in many environments, Decca's whisper-soft fans keep the system cool without the hum you often hear with other systems.

The foundation for the world's best
interactive video wall starts with
Decca.
